

United States Senate
Office of the President of the United States'
Senate Mr. Mike Pence
Washington, D.C. 20510

March 15, 2019

Dear Mr. Vice President Pence:

Please respectfully receive our letter to you, to Senate Majority and Minority leaders, to number of U.S. Senate's Committees as well as to number of Senators individually enclosed. In this letter we like to inform the United State Senate and Senators of our advanced zero-carbon-emission fossil energy process, which corroborates unequivocally the Green New Deal by number of irrefutable facts, while exceeding the anticipated objectives of the Green New Deal by few other advantages for perusal of all Senators.

We share candidly that the same information has been passed on to United States' House of Representatives' Committees and many representatives individually too. We informed Governor of the State of Maryland Mr. Hogan and Mr. Lieutenant Governor Mr. Rutherford. We kindly inform you that we have informed, or will inform all Presidential campaign candidates, who are willing to reinvigorate the Clean Energy and poised to implement Green New Deal bill, legislation and policies to the benefit of United States' economical hegemony as well.

As we will follow up with our petition to the congress for hearing and meeting with Senators, Representatives and Governors of the State of Maryland and other Representatives, you will be receiving our petition for a meeting in due course too. In this regard, we implore you to advise your Senate's administration for sharing this letter with other Senators, thank you very much.

Respectfully Yours

F. Bairamijamal

EVISA Engineering presents the Zero-Carbon-Emission CPCE process
(Carbon Power & Chemicals Economy) to the Congress of the United States in
pursuit to the Green New Deal, Clean Energy and carbon-free Clean Coal

Recipients:

President of the United States' Senate, Mike Pence

Senate Majority Leader, Senator Mitch McConnell

Senate Minority Leader, Senator Chuck Schumer

United States' Senate's committees and sub-committees for:

- Energy to Chair Senator Bill Cassidy and Ranking Member Senator Martin Heinrich
- Water and Power to Chair Senator Martha McSally and Ranking Member Senator Catherine Cortez Masto
- Energy, Natural Resources and Infrastructure to Chair Senator Tim Scott and Ranking Member Senator Michael Bennet
- Rural Development and Energy to Chair Senator Joni Ernst and Ranking Member Senator Tina Smith
- Energy and Water Development to Chair Senator Lamar Alexander and Ranking Member Senator Dianne Feinstein
- Interior, Environment and Related Agencies to Chair Senator Lisa Murkowski and Ranking Member Senator Tom Udall
- Economic Policy to Chair Senator Tom Cotton and Ranking Member Senator Catherine Cortez Masto
- Communications, Technology, Innovation and the Internet to Chair Senator John Thune and Ranking Member Senator Brian Schatz

List of other proponents to the Green New Deal members of the Congress in Senate and Senators of the State of Maryland:

Senator Ms. Kirsten Gillibrand	Senator Joe Manchin III	Senator Ms. Kamala Harris
Senator Mr. Edward Markey	Senator Cory Booker	Senator Mr. Bernie Sanders
Senator Elizabeth Warren	Senator James Risch	Senator Ron Wyden
Senator John Barrasso	Senator Steve Daines	Senator Martha McSally
Senator Cory Gardner	Senator Amy Klobuchar	Senator Mazie Hirono
Senator Maria Cantwell	Senator Martin Heinrich	Senator Lamar Alexander
Senator John Hoeven	Senator Debbie Stabenow	Senator Angus S. King, Jr.
Senator Bill Cassidy	Senator Ben Cardin	Senator Chris Van Hollen

Other members, interested to the Green New Deal, might addressed on upon the discretion of Speaker of the Senate's President

Dear Senators in the Congress of the United States:

We are very pleased to recognize the exceptional undertaking of the Congress members to pursue the Green New Deal bill and legislation in order to implement the achievements of the clean energy under the purview of the sustainable renewable energy for power generation, gasoline, and Mother Chemicals. We greet with gratitude these members to embrace the technological and economical achievements of the present and recent time for commercial use of Green Energy at large scale in the United States.

We hereby respectfully apprise the Congress of the convincing technological and economical none-competitive capability of the CPCE process in zero-GHG-emission for the five Stationary Sources of GHG emission that is culprit for nearly 75% of global GHG. The advantageous of the CPCE in upgrading of the existing fossil energy or in new installation plants is unequivocally indisputable to the experts of the Energy and Environment Committees, the United States Department of Energy and every other expert, which broach substantive basis for the Green New Deal bill and legislation.

With respect to the ambit of the Green New Deal bill we respectfully inform the Congress of our CPCE process; Carbon Power and Chemical Economy, with zero carbon emission, which is grounded substantively upon the fundamental principles for the re-use of the captured green house gas, the carbon dioxide and employment of the CO₂ as a new inexhaustible sustainable fossil energy resource now. We proudly stress to the Congress that, unlike other similar clean energy processes which lead to an increase of power generation and manufacturing costs, the CPCE is the first-of-kind process that lowers the manufacturing costs for gasoline, chemicals and power generation, i.e. CPCE performs an economically positive venue with a ROI return of invest in the margin of three to about five years. The CPCE is specifically designed in a manner that it can be implemented both in existing plants to benefit from and also for the new plants to install, particularly the new super-efficient hydrogen based power generation with a gross efficiency of nearly 90% that now envisions up to nearly 30% lower costs for power generation.

A short description of the CPCE with the last update of the ongoing patent application procedure with the United States Patent and Trademark Office of January 24, 2019 is enclosed to this letter for your perusal. Please kindly receive our willingness to provide our reasoning to the members of the Congress or any Congressional Commission if you wish to have any discussion opened and questions answered. We thank you for your attention in pursuit of sustainable clean energy for our nation, and remain respectfully with,

Very Truly Yours

F. Bairamijamal
