**Petition to the White House' Office of Science and Technology Policy for a hearing**

Dear Mr. Director Droegemeier:

Please receive respectfully our sincere congratulation to your new appointment to advise Mr. President Trump in matters of science and technology. With respect to the extraordinary valor of great number of politicians to reinvigorate the Clean Energy under the ambit of Green New Deal now, we might inform you of our recent correspondence with number of Congress' Committees as well great number of Congress' members and the Governor of Maryland Mr. L. Hogan about our CPCE process that can serve as a bulwark to support the Green New Deal bill and legislation to come.

The CPCE performs significant techno-economic merits in advanced zero-carbon-emission fossil energy by harnessing the captured carbon dioxide and its economically profitable conversion to syngas and oxygen subsequently that substantiates the re-use of carbon dioxide as a new fossil energy resource, to resolve the global warming by addressing the five group of the Stationary Source of emission with noticeable costs reduction to production of commodity chemicals (gasoline, ammonia, methanol, ethanol, etc.) and the power generation with some other advantages in addition.

A short description of the CPCE with a proposed points of agenda from my end for a meeting is enclosed to this letter for your perusal and advice. I equally will be grateful if you might inform Mr. President in this matter, thank you very much.

Respectfully Yours

F. Bairamijamal  
President

Enclosed: Copy of Congress' letters of February 14, 2019  
CPCE Short Description, 4 pages
