Request for intervention of OAI in pursuant to the Three Requests to DOE, DOC and EPA

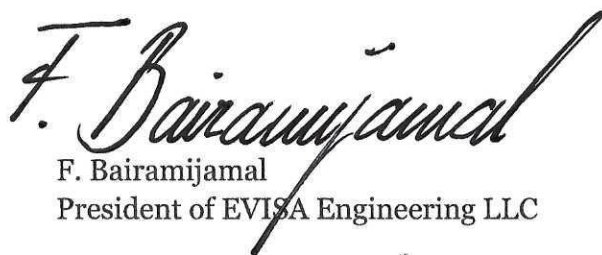

Dear Mr. Senior Advisor Jared Kushner:

First and foremost, we trust this letter finds you well during this pandemic time of Covid-19, wherein the nation is experiencing the uttermost despaired Political Impotence of the present Administration, unparalleled amid all the governments around the globe.

With the present letter to you today, we hereby implore for OAI's decisive intervention, because we have been received with such an improper egregious response from the DOE on February 05, 2020 that has instigated us to undertake few preparatory measures before commencing more earnest strides now. Since our process can produce trillions of Dollars within 10 years, yet just in the United States alone, we will pursue the commercialization of our CPCE process (Carbon Power and Chemicals Economy) to the interests of the United States' nation and economy in full force whatsoever it may take. In this regard, we apprise you of our Three Requests to DOE, DOC and EPA of July 02, 2020 for execution of independent peer reviews. We will appreciate your expeditious supports for our process to resolve the global warming.

As the Clean Coal and the Advanced Fossil Energy has been disaffected heavily with the rise of deplorable global warming deniers as early as of early 2017, it is the time to disable those mega-profile "lobbyists", who are serving overtly or covertly to the foreign oil and gas exporting countries like Russia, Saudi Arabia and other OPAC countries. Therefore, we are calling to every responsible Officials in the Administration to debunk the heap of the Alternative Fact fabrications and put our national interests for prosperity at the highest priority, thank you.

Respectfully Yours

F. Bairamijamal
President of EVISA Engineering LLC
